# About us

Webs Jyoti, Established in 2009, development and training organization, offers to corporations, institution and individuals worldwide.

We provide something beyond classroom training. We prepare the students for corporate by providing them with 6 hours internship after the completion of their course.

We are not just an institute but we are a company with a successful history of delivering 450+ projects.

## Why Web Designing and Development?

Every new or existing business require a website to publish their profile and their services in the corporate world. Apart from the new business, you could have opportunity to work on the existing website and web projects.

According to W3Techs, 78.8% of all websites are using PHP for their server-side scripting PHP is one of the most popular languages among developers due to its widespread use.

## Why Join Webs Jyoti?

We provide 7 days of free trial classes to the students so that from the very first-day eligibility and the learning ability of the students/interns can be observed. In the first week participants students are monitored for their eligibility in the creativity, programming, and thought process.

Learning Web Designing with a development company means you learn how to work in company's environment along with learning PHP and other Web Services. All developers and designers who will teach you have 15+ years experience in Training and development.

Understanding Layers and Tools  
Logo and Banner Designing  
Masking and Pen tools in Photoshop  
Making flyers and sliders  
Working with imported graphics  
Designing banners for the website

- Live Project Study
- Interview Preparation & Seminars

# Course Module - PHP, Advanced PHP Training

## Introduction to PHP

The origin of PHP  
How PHP works with the web server  
Understanding LAMP Technologies

## PHP Building Blocks

Basic PHP syntax  
Displaying type information  
PHP Flow Control

## Writing Web Pages with PHP

HTML scripts and Form's element  
Retrieving form data  
Redirecting web pages  
Storing information using cookies  
Tracking users identification

# Course Module - PHP, Advanced PHP Training

## Functions in PHP

- Using require () and include ()
- Arrays ( Single & Multi-dimensional)
- PHP- LANGUAGE BASICS
- Flow control, loop statements
- Arrays & strings, PHP functions
- PHP mail function
- Defining Errors / Warnings

## Session Management

- Introduction to Session Control
- Session Functionality
- Registering Session variables
- Destroying the variables and Session
- CURD (Login, Register, Update Profile, Change & Forgot Password, Logout) etc.

## Working with MYSQL Admin

- Working with PHP My Admin
- Types Data Type
- Managing Database & Tables
- Alerting Fields Properties
- Running Queries on Linux Environment

## MySQL Database

- Queries / Sub Queries, Joins
- Date and Utility Functions
- Working with PHP-MySQL
- Procedures & Triggers

## Advanced modules

- working with uploaded files
- Captcha generation
- PHP & JS Pagination
- CSV Operations
- Social media integrations
- Linux Crown Jobs
- Ajax Technology

## Major Activities

- Create and manage dashboard & admin
- Adding Pagination to limit your result
- Handling images, and other docs from db
- Configuring Payment Gateways API
- Embedding Google Map API
- Adding Ajax to make search faster
- Advanced / Refine Search
- Bulk Mails and Notification setups
- SMS and OTP Integrations
- Generate verification url and auto approvals,

## OOPs Concept

- Class & Object
- Access Modifier
- Properties of Object
- Encapsulation and abstraction
- Inheritance, Getter & setters
- Polymorphism.

## Understanding Server Configurations

- FTP Management
- Hosting- NS, AR, and EPP Codes
- Email and Sub domains
- Backup / Restore Website / SQL
- Checking Web Traffic and Visits
- Crown Jobs

## CMS - WordPress

- Site-wide settings
- Setting up and organizing menus
- Managing content articles
- Choosing and configuring Themes
- User Managements
- Placing Widgets
- WordPress Editor
- Setting up theme options
- Using Import / Export Tool
- Working with XML Files

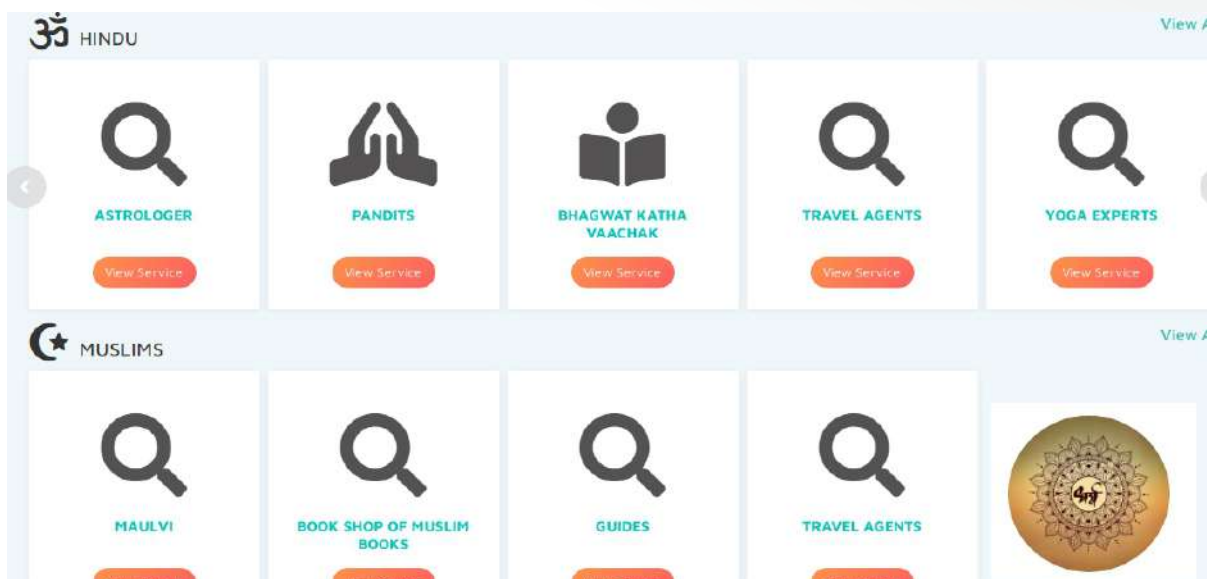

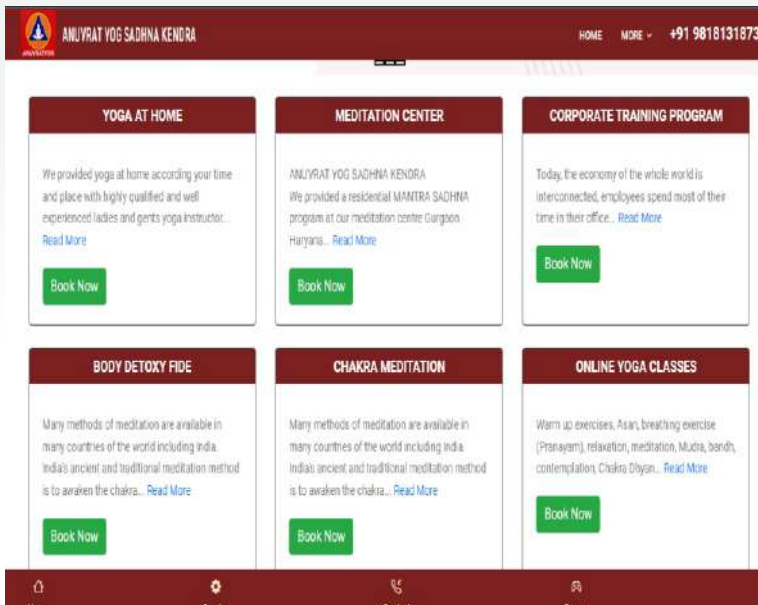

## Working with APIs

- Introduction to REST APIs
- How JSON and Ajax working
- Working with Google Chart APIs
- SMS api integration
- Payment gateway integration in PHP
- Transform data records to JSON format
- Retrieve data from json
- receive output through getElementByld
- Other APIs

## FrameWork – Laravel

- Setting Up and Installing Laravel
- Basic Routing, Responses & Middleware
- Blade Templates
- Using Forms and Gathering Input
- Using Controllers and Routes for URLs and APIs
- Storing and Using Data
- Basic Database Usage
- Displaying Your Views
- Creating and Using Composer Packages
- Authentication & Authorization
- Project Study
